Q3 2025 Executive Summary

Northwind Robotics reports third-quarter 2025 revenue of EUR 18.4 million, an increase of 22% year over year. Gross margin improved to 41%.

The quarter closed with a cash position of EUR 31 million and no outstanding debt.

Segment Performance

Robotics hardware contributed EUR 12.1 million in revenue, software subscriptions EUR 4.2 million, and professional services EUR 2.1 million.

Software subscription revenue grew 38% year over year, the fastest of the three segments.

Operating Costs

Research and development spending reached EUR 3.8 million, representing 21% of quarterly revenue. Total headcount grew from 240 to 265 during the quarter.

Sales and marketing costs were flat at EUR 2.4 million.

Q4 Outlook

Management guides fourth-quarter revenue of EUR 20 to 21 million. A new engineering office in Munich is planned to open in the first quarter of 2026.

The Hive fleet manager version 4.0 launch is scheduled for December 2025.

Risk Factors

Lead times for solid-state lidar units remain elevated at 26 weeks, posing a supply chain risk for hardware deliveries.

Approximately 35% of revenue is denominated in US dollars, creating currency exposure against the euro.
